

The 3rd International Neonatology Association Conference

7 – 9 July 2017 • Lyon, France

www.worldneonatology.com | secretariat@worldneonatology.com

Dr. Wally Carlo has a long-standing interest in respiratory disorders in neonates, including minimizing lung injury. He has done research to optimize ventilatory strategies to reduce chronic lung disease and was involved in a multidisciplinary multicenter QI project to reduce chronic lung disease in neonates.

Dr. Carlo has published over 400 articles in peer-reviewed journals on respiratory and other neonatal topics over the past 3 decades, all while being actively involved in clinical trials and teaching Pediatrics at the University of Alabama at Birmingham. He is currently the Director of Newborn Nurseries at the University of Alabama Medical Center and Children's Hospital of Alabama
