

The 3rd International Neonatology Association Conference

7 – 9 July 2017 • Lyon, France

www.worldneonatology.com | secretariat@worldneonatology.com

Prof. Olivier Baud is a leading neuroscientist and head of a research team within INSERM Unit 676 as well as the head of the NICU of the Robert Debré Children's Hospital, one of the premier paediatric hospitals in Europe.

He is full professor of Paediatrics at Paris-Diderot University.

He founded his own research INSERM team in 2006, a team that is emerging as a leader in preclinical research on neuroprotection and brain repair, and clinical research in many fields in neonatal intensive care.

This research team has been rated "A" by the national "Agence d'Evaluation de la Recherche et de l'Enseignement Supérieur" in 2009 and 2013.

During the course of his career, Prof. Baud has successfully coordinated clinical and experimental research programs. He has also successfully applied for several grants during this period, including one ERC (headed by M Tanter), a Mairie de Paris research award, 3 National Hospital Program of Clinical Research, 2 ANR, 1 FRM Medical Research Foundation, 1 DIM Stem-pole and 1 Fondation de l'Avenir grant, more than 2.4 M€ in funding as principal investigator.

He is involved in the teaching of several courses in paediatrics and neuroscience at Paris-Descartes and Paris-Diderot Universities. He is currently an academic editor for PlosONE. He has published more than 130 papers from 2004 up to the present, and he has an h-index of 25
