Virgilio P. Carnielli, MD, PhD, is Professor of Neonatal Pediatrics at Polytechnical University of Marche. He also is Director of Neonatal Medicine at G. Salesi Hospital in Ancona, Italy. He graduated from the University of Padua School of Medicine, and completed an internship, residencies (in pediatrics and neonatology) at University Hospital in Padua, He was a Fellow at the Hospital for Sick Children in Toronto Canada for 3 years from 1984 and 1987 and he spent 4 years as Consultant Neonatologist at the Sophia Children's Hospital in Rotterdam, The Netherlands. Prof. Carnielli's primary research interests are nutrition and metabolism in neonatology and pediatrics, with a secondary interest in neonatal audit and epidemiology. He has two main research lines: Lipid metabolism and the impact of dietary lipids on brain composition and function in the human neonate; and the metabolism of pulmonary surfactant. This research has a focus on biochemical and functional aspects, and concentrates mainly on the use of stable isotopes that allow the study of the kinetics of nutrients and drugs even in smaller infants. Prof. Carinelli is a member of several professional associations, he serves as editor and he is in the editorial board of several scientific journals.
